

My creative slime

T56

PURPOSE & HYPOTHESIS

I want to find out if when I add one extra ingredient it will react differently or if it will react the same way as normal slime reacts. I think that if I'm going to add shampoo, hand sanitizer and soap the shampoo is going to have the best reaction because it won't be sticky and it won't evaporate. I think that if I add shampoo it will be soft and smooth. I think that if I add hand sanitizer it's going to feel all gooey because hand sanitizer moves around alot. I think that if I add soap it will feel sticky because soap is normally sticky.

RESEARCH

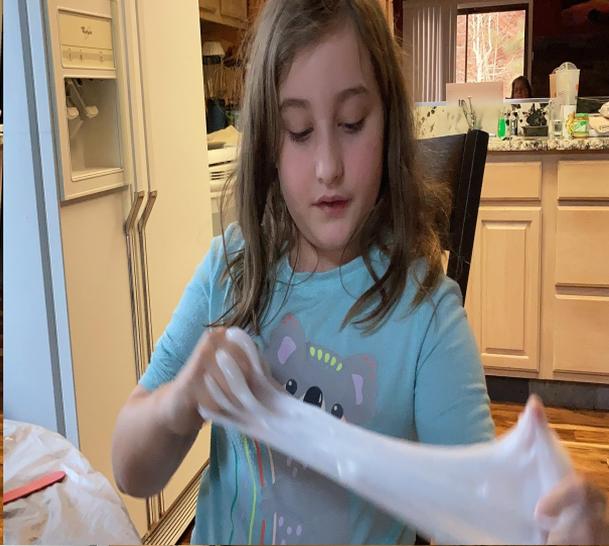

I have tried to use many slime recipes and I found that the Michael's slime recipes.

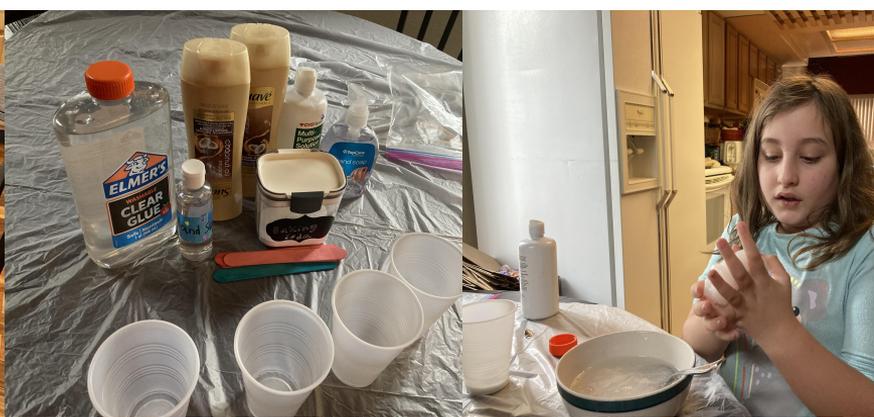

MATERIALS

- Clear washable school glue
- Arm & Hammer baking soda
- Multipurpose contact lens solution
- Hand sanitizer
- Hand soap
- Shampoo
- Vegetable oil

EXPERIMENT

1. I added baking soda
2. Then I added contact lens solution
3. I put in clear washable school glue
4. I mix it in a bowl once it got hard to mix
5. Then I started kneading the dough
6. I split it into 4 then I added...
7. I added hand sanitizer
8. I added soap
9. I added shampoo
10. I added vegetable oil

ANALYSIS

Shampoo

It changed its color into a pearly and it smelled like coconut

Soap

The it was sticky

Hand sanitizer

The hand sanitizer didn't make the slime change

Vegetable oil

Made it harder and rougher to play with

CONCLUSION

This was a very fun experiment because I got to make and play with slime!

When I added shampoo it had the reaction I thought, it was soft and smooth.

When I added hand sanitizer it did not have the same reaction I thought, it did not change the slime. When I added soap it had the reaction I thought, it was sticky.

Since the hand sanitizer did not change the slime I added vegetable oil and it made the slime rougher and harder to play with.

In conclusion if you want your slime to be soft and smoother add shampoo.

REAL WORLD CONNECTION

I love making slime and wanted to know how to make soft and smooth slime to tell my friends.
